SUMMARY

Results-driven Full-Stack Developer with 1+ year of professional experience building end-to-end web solutions across manufacturing and service industries. Proficient in Laravel, React JS, Next.js, TypeScript, Node.js, and MySQL/PostgreSQL, with hands-on experience in REST API development, CI/CD pipelines with GitHub Actions, and cloud deployment via Vercel, Railway, and VPS. Demonstrated ability to independently analyze business requirements, design system architecture, and deliver complete production-ready applications covering multiple departments and user roles. Experienced in integrating modern development workflows including version control, automated deployment, and AI-assisted development tools. Currently pursuing Master of Computer Science to deepen expertise in software engineering and system architecture.

WORK EXPERIENCE

IT System Analyst & Full-Stack Developer

PT Ganzu Gisma Seiko | Hybrid | Aug 2025 - Apr 2026

- Analyzed business processes across 9 departments, identifying bottlenecks and automation opportunities.
- Designed comprehensive ERP solution architecture integrating production, warehouse, quality, and finance modules.
- Developed end-to-end manufacturing ERP system from database design to user interface using Laravel & MySQL.
- Implemented automated workflows connecting customer orders to delivery and invoice generation.
- Built material requirement planning (MRP) with automated purchase request generation workflow.
- Implemented multi-stage quality control system tracking incoming, in-process, and outgoing inspections.
- Created production scheduling module managing work centers with real-time progress tracking.
- Built warehouse management system handling material storage, stock control, and delivery documentation.
- Integrated financial module auto-generating invoices from delivery documents with payment tracking.
- Key results: reduced production planning time by 70%, improved inventory accuracy to 98%, streamlined order-to-delivery cycle by 45%.

IT Developer: HR & Customer System

Rainbow Sulam Alis | Project-Based | Jan 2025 - Oct 2025

- Led full-stack development of 3 business management applications, delivered 14% ahead of schedule.
- HRD Dashboard: Built comprehensive HR system with GPS-based attendance, geofencing validation, automated training management, role-based authentication, and real-time analytics dashboard.
- Aftercare Dashboard: Built multi-role system with automated WhatsApp bulk messaging, low-rating auto-detection, complaint resolution workflow, and real-time branch performance analytics.
- NailShade Booking System: Built end-to-end booking platform with QR code walk-in system, automated WhatsApp feedback collection, therapist leaderboard, and branch comparison dashboard.
- Key results: aftercare response rate +85%, recruitment processing time -80%, rating collection rate improved from 20% to 78%.
- Integrated RESTful APIs with AJAX for real-time operations; implemented role-based access control protecting sensitive HR data.

IT Support Intern

PT Komatsu Undercarriage Indonesia | Nov 2023 - Jan 2024

- Assisted IT team with technical support, hardware maintenance, and system deployment activities.
- Contributed to development of Delivery Note Module Application using Alpha Anywhere platform.
- Conducted research and designed a Web-Based Shipment Monitoring Application for Logistics Process Optimization.

SKILLS

Programming Languages: PHP, Python, JavaScript, TypeScript, HTML5, CSS3
Frameworks & Libraries: Laravel (v9-12), CodeIgniter 3 & 4, React JS, Next.js, Vue.js, Node.js, Bootstrap 4 & 5, Tailwind CSS, Chart.js, jQuery, Anthropic API
Database Management: MySQL, PostgreSQL, SQL (Database Design, Optimization, Query Performance)
Cloud & Deployment: Vercel, Railway, VPS/Hostinger
DevOps & Tools: Git & GitHub, GitHub Actions (CI/CD), REST API Development & Integration, Responsive Web Design, PDF Generation, AI-Assisted Development (GitHub Copilot, Claude)
Design Tools: Figma, Canva, Adobe Photoshop
Specializations: ERP System Development, POS Applications, Admin Dashboard, Full-Stack Web Development, System Analysis & Requirements Gathering
Methodologies: Agile Development, System Testing & Debugging
Soft Skills: Analytical Thinking & Problem Solving, Communication & Stakeholder Collaboration, Project Management, Adaptability, Time Management
Languages: Indonesian (Native), English (TOEFL: 590)

EDUCATION

Universitas Esa Unggul <i>Master of Computer Science (S2)</i> GPA: In Progress	2026 - Present
Universitas Bina Sarana Informatika <i>S1 Teknologi Informasi</i> GPA: 3.95/4.00 TOEFL: 590	2020 - 2025

CERTIFICATIONS

- PHP Certificate: Beginner to Advanced - Udemy (2024)
- Web Development Certificate: Front End Web - Coding Studio (2024)
- Internship Completion Certificate - PT Komatsu Undercarriage Indonesia (2024)
- Certificate of Achievement: NailShade Application Development - Rainbrow Sulam Alis (2025)
- Certificate of Achievement: Rainbrow Management System - Rainbrow Sulam Alis (2025)
